

- 1)The FCC should not implement any proposal that would lessen or jepordize Indiana's Telephone Privacy Act.
- 2)It has saved my family and I numerous unwanted trips to the phone and has improved our family time.
- 3) It has virtually elimitnated , for what I consider, totally useless calls. Calls that I hang up immediately anyway!!!
- 4) I am contacting my US Senators/Representatives to express these views, as well.
- 5) Please do not change this important "State" law/act. It is a "State"to "State" issue not a Federal issue.

Thank-you,
Dennis W. Pierce
